

America's first hospitality-driven premium EV charging network

THE PROBLEM

The EV Charging Experience is
Broken

01

Unreliable Infrastructure

Nearly 1 in 3 public charging attempts still fail

(ChargerHelp, 2025)

02

Poor Location Strategy

Networks treat charging as a utility stop, not a destination worth making

03

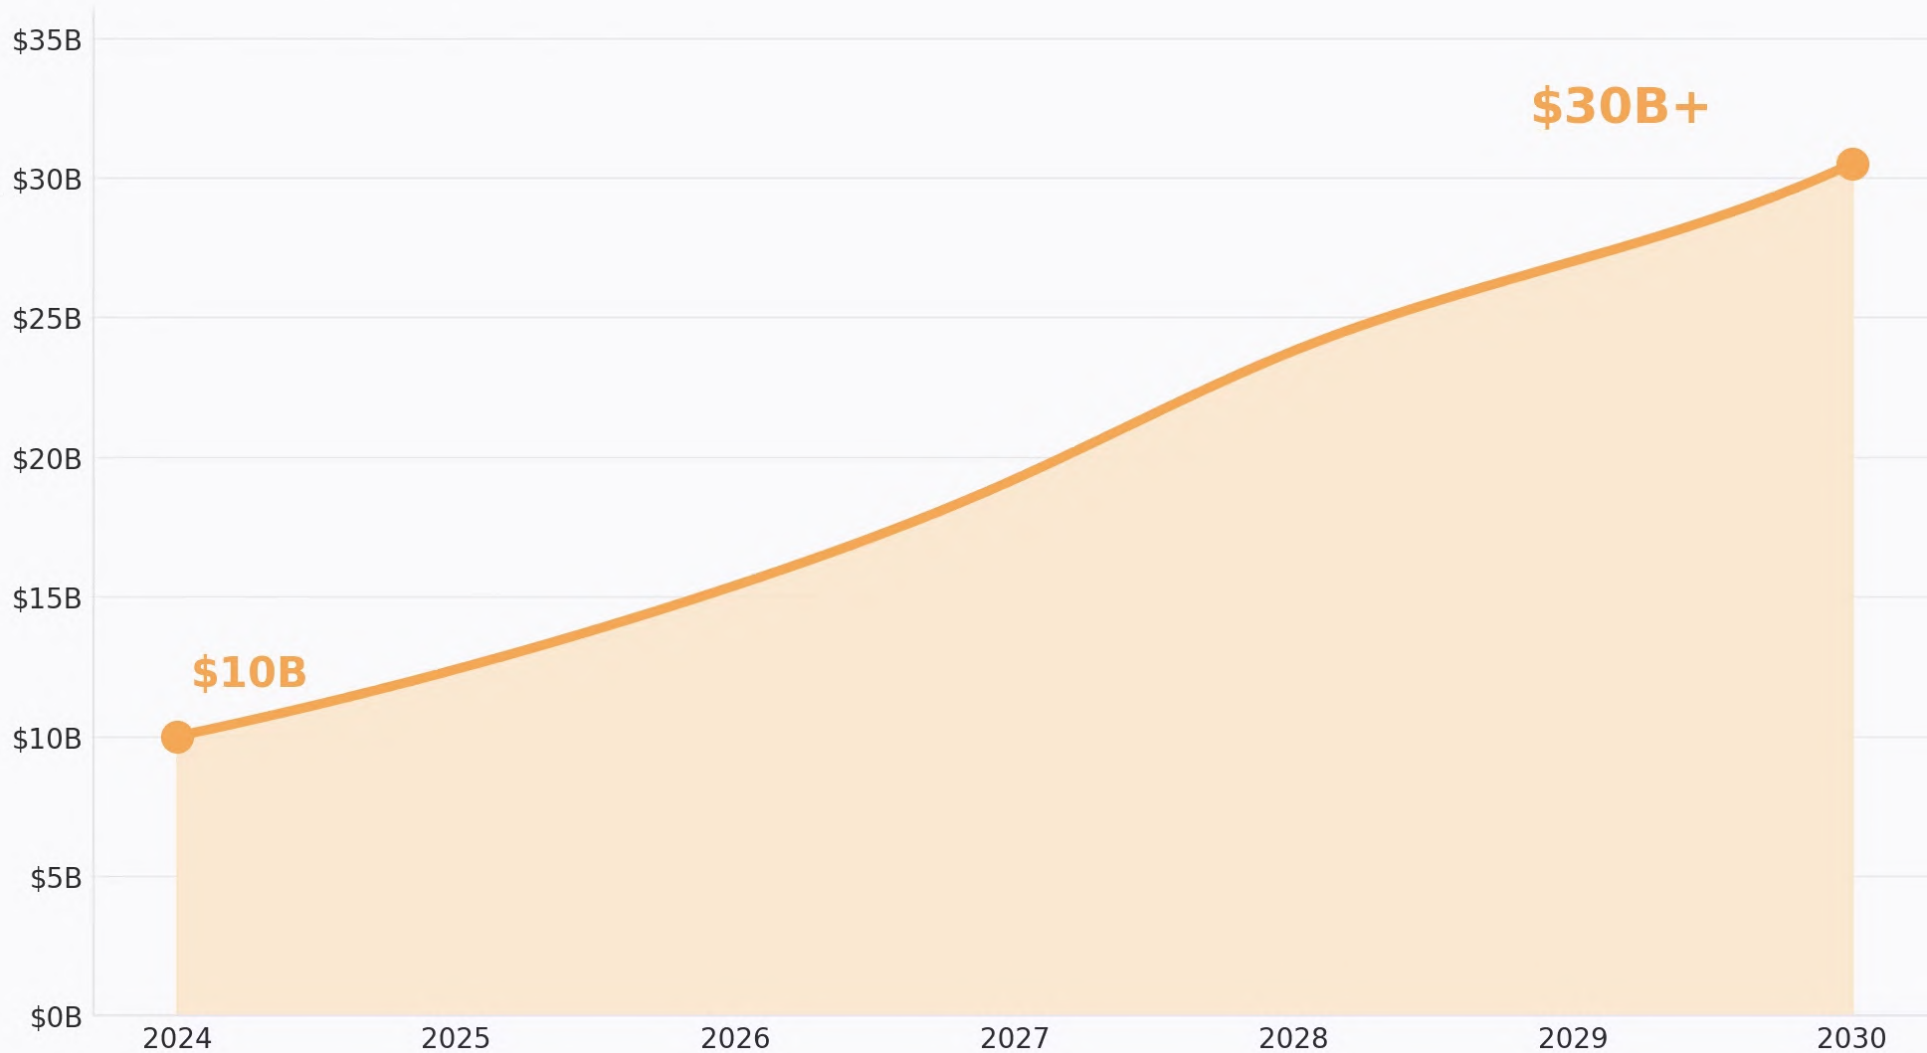

No Hospitality

Charging is transactional with no amenities or comfort

MARKET OPPORTUNITY

Massive Market, Perfect Timing

US DC Fast Charging Market

- US DCFC market: \$10B → \$30B+ (2030)
- 18,000+ new ports deployed in 2025
- US infrastructure exceeds 70,000 ports
- Premium segment emerging

• Market sizing: Grand View Research, DC Fast Charging Stations Market Report (2025)
• 2025 deployment: Paren, Full-Year 2025 State of the US EV Fast Charging Industry Report (January 2026)

THE SOLUTION

Hospitality-First EV Charging

- **Summit**
 - Hospitality-first destination
 - Lookouts, clubhouse, 100% off-grid
- **Basecamp**
 - 2,500+ sq ft flagship staffed driver's lounge
 - 10-12 ports
- **Waystation**
 - 1,000-1,200 sq ft automated Lounge
 - 8-10 ports
- **Trailhead**
 - Compact and flexible with covered canopy
 - 2-4 ports (expandable to 10)

Cafés • Lounges • Premium amenities • Off-grid options

BUSINESS MODEL

Multiple Revenue Streams Across Four Formats

01	Charging Revenue: \$0.50/kWh base rate. Primary revenue driver across all formats.
02	Retail & Food Service: Café and automated retail at all Basecamp/Summit locations - Automated at Waystations)
03	Advertising: Digital displays at all locations featuring brand & tourism partners, local attractions
04	Incentives & Credits: State and federal programs including tax credits, infrastructure incentives, and rebates (where applicable)
05	Partner Revenue: Tourism partnerships, event sponsorships, and affiliate commissions
06	Lodging Revenue (Summits): Lookout bookings add a lodging revenue channel at all Summit locations

COMPETITIVE ADVANTAGE

Why Rangeway Wins

1

Destination-Focused

Locations where people travel TO,
not just through

2

Hospitality DNA

Premium lounge experience
inspired by Under Canvas and
AutoCamp

3

Four-Format Network

From Trailhead entry points to full
Summit destinations with overnight
stays

4

Off-Grid Capability

Select sites operate 100% off-grid
with solar, battery storage

TRACTION

Active Pipeline, Real
Momentum

Current Pipeline

- **Active site in California**
- **Active site in Missouri**
- **Active site in Montana**
- **Architectural concept project pending in St. Louis**

Momentum

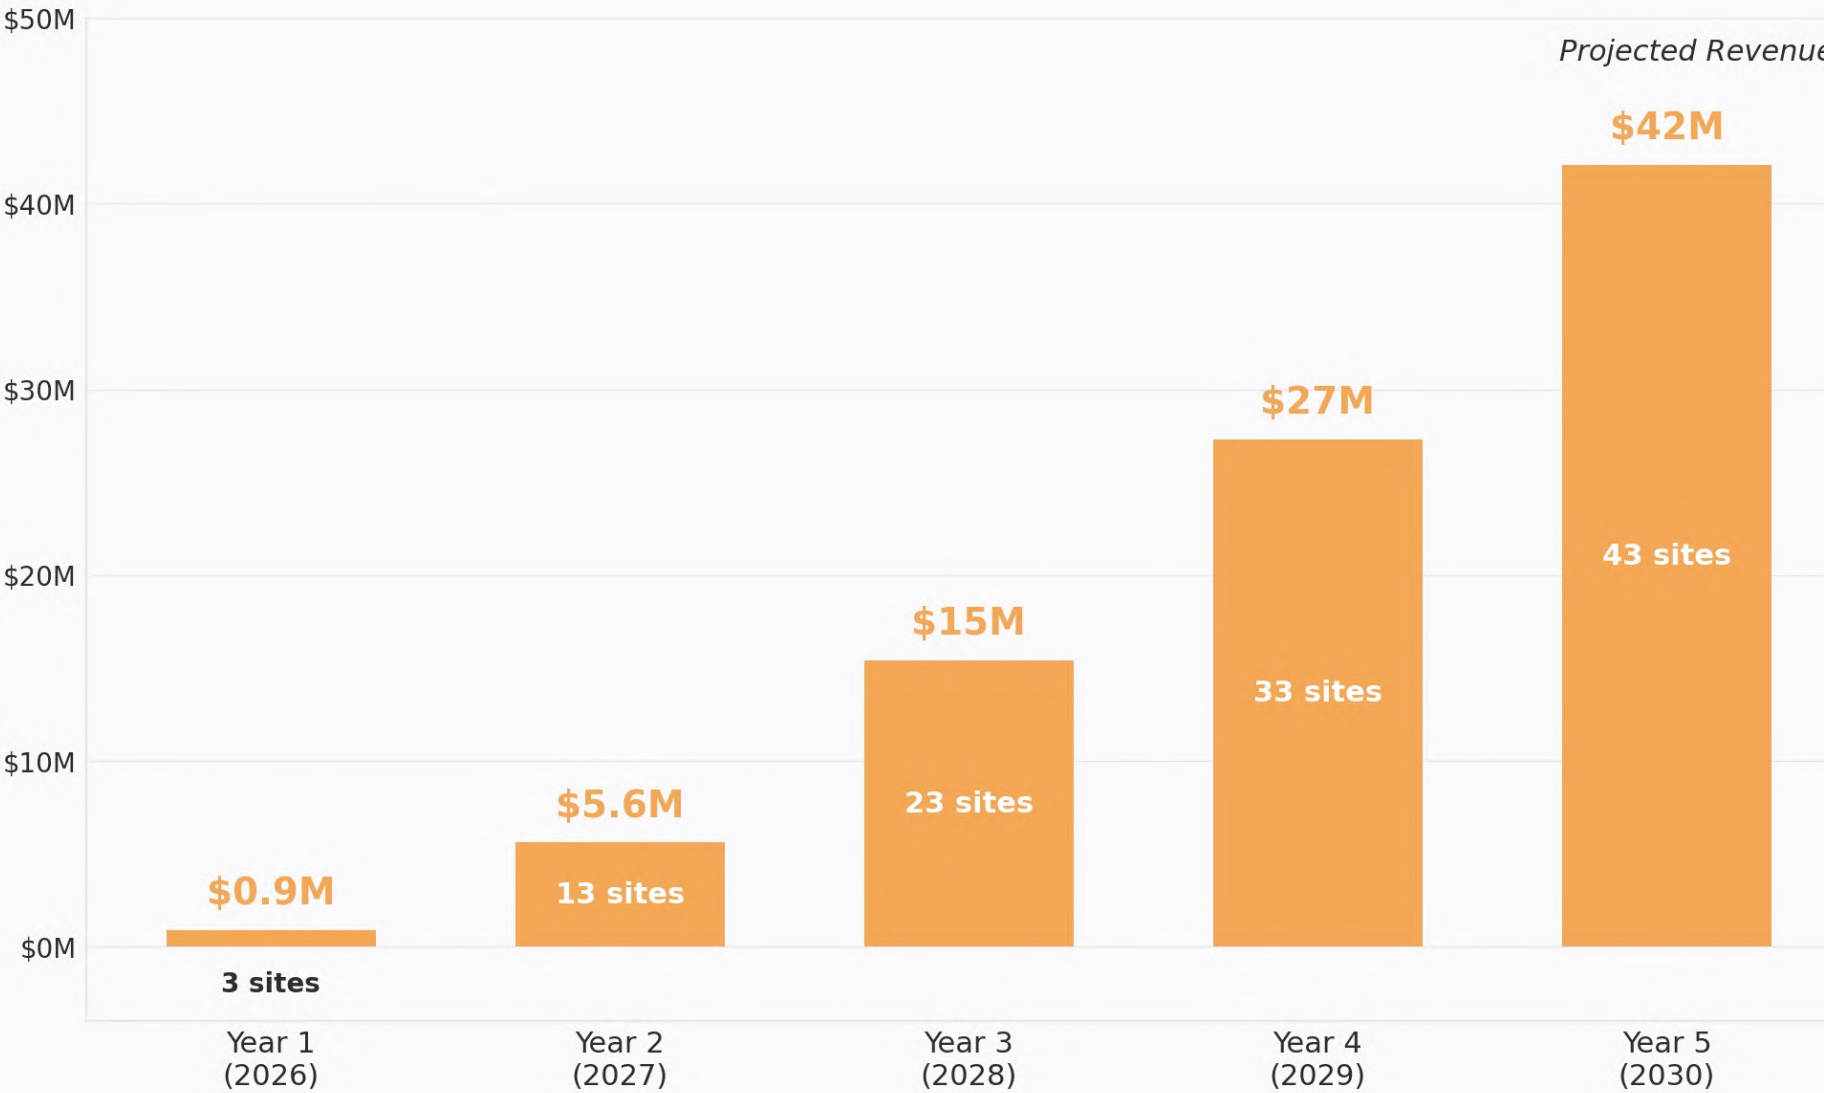

- **Energy infrastructure partners in place**
- **Structural and building partner under LOI**
- **Named top emerging CPO for 2026**
- **Pepperdine Most Fundable Companies quarter-finalist**

FINANCIAL PROJECTIONS

Path to Profitability

5-Year Projections

- Year 1: 3 sites | \$0.9M revenue
- Year 2: 13 sites | \$5.6M revenue
- Year 3: 23 sites | \$15.4M revenue
- Year 4: 33 sites | \$27M revenue
- Year 5: 43 sites | \$42.1M revenue

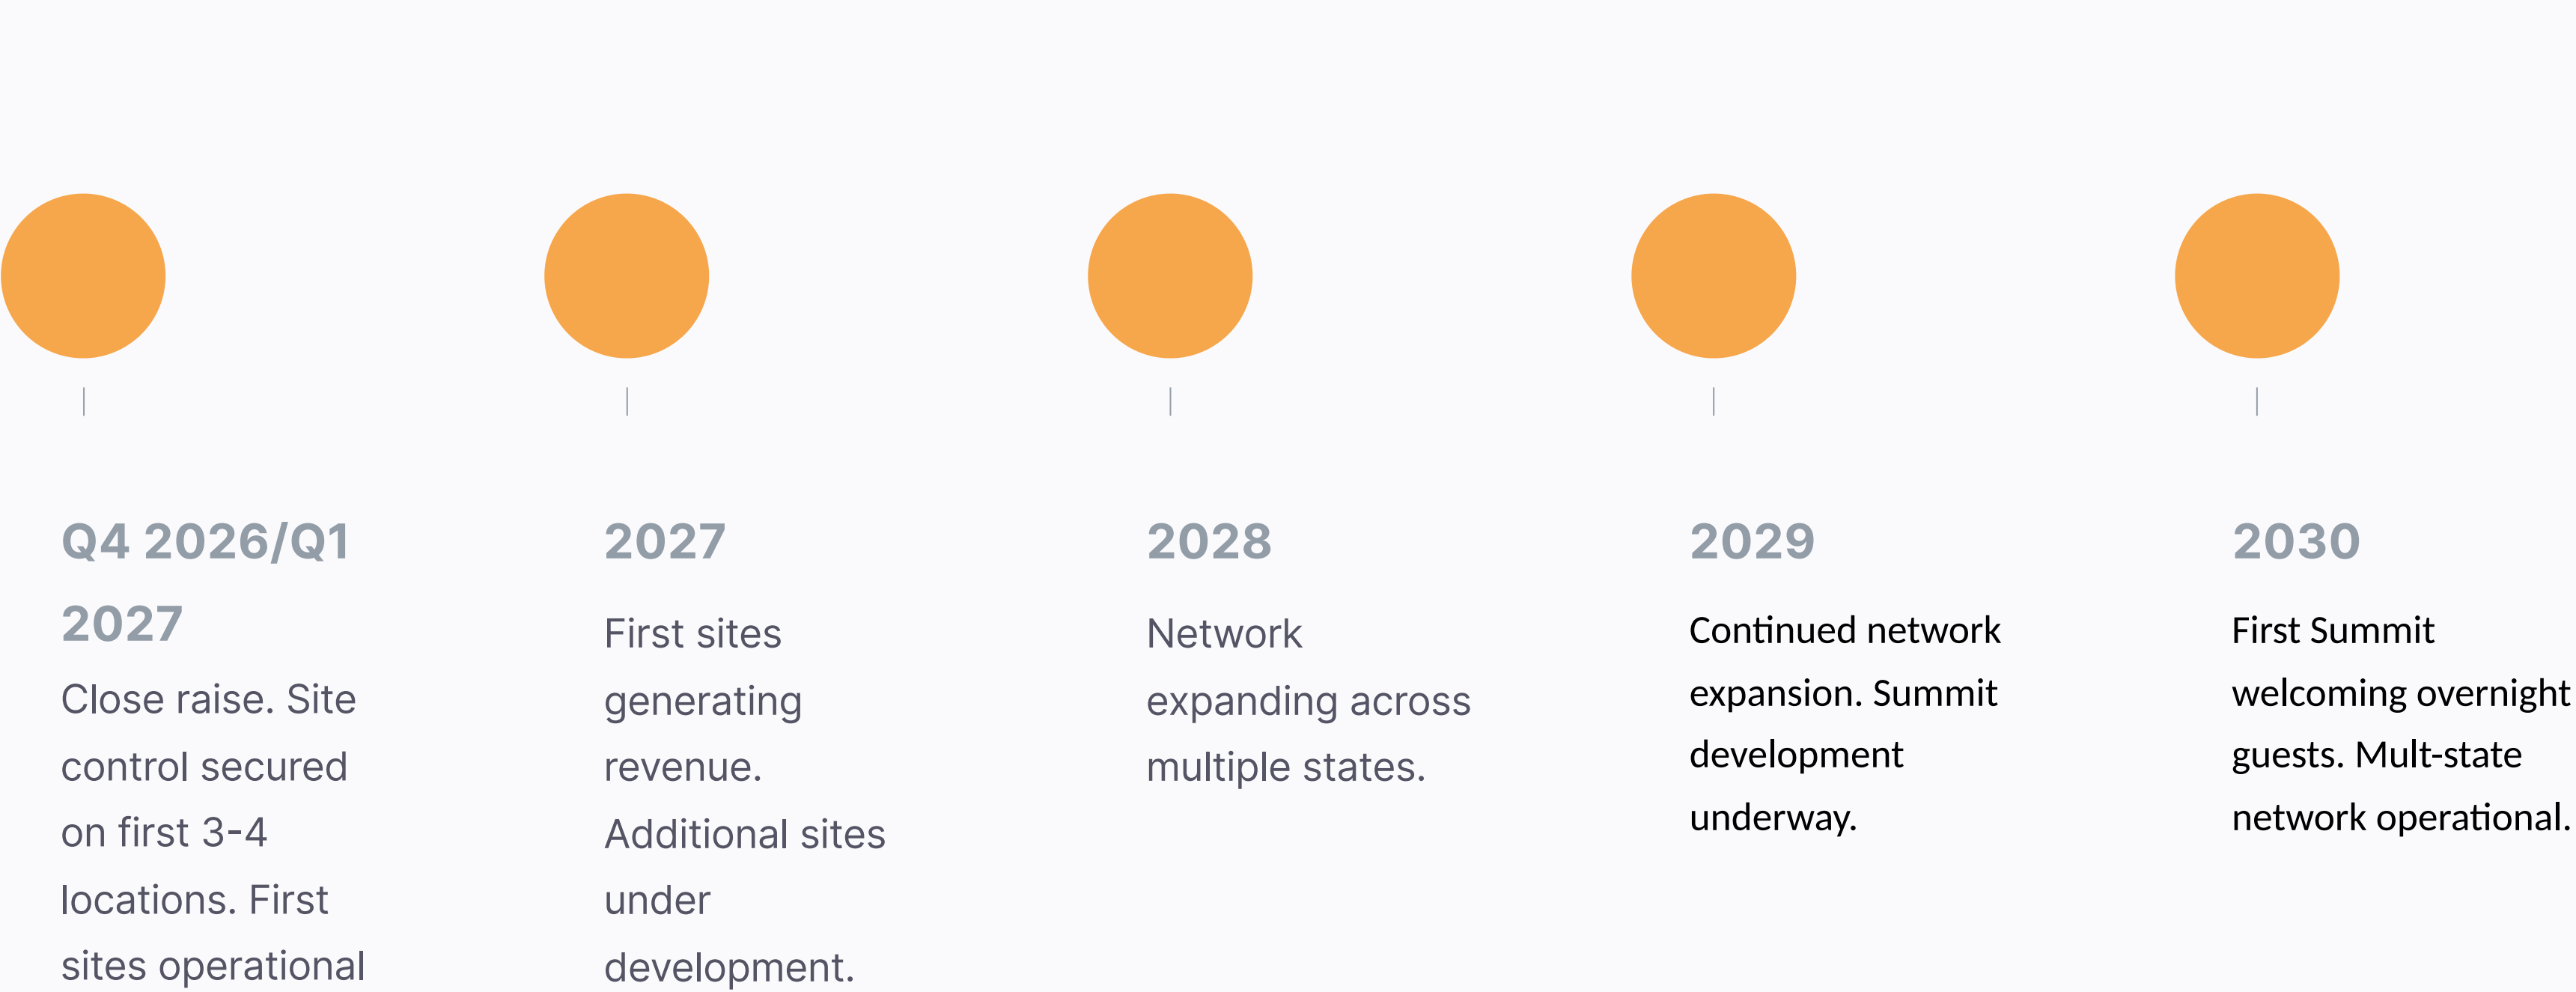

Unit Economics

- 8 chargers per site, 120 kW average draw
- ~\$1M stabilized revenue per site at maturity
- EBITDA margin: 7% Year 1, scaling to 22% by Year 5

Y1 reflects first-site operations with utilization ramping through year. Full 5-year model available under NDA.

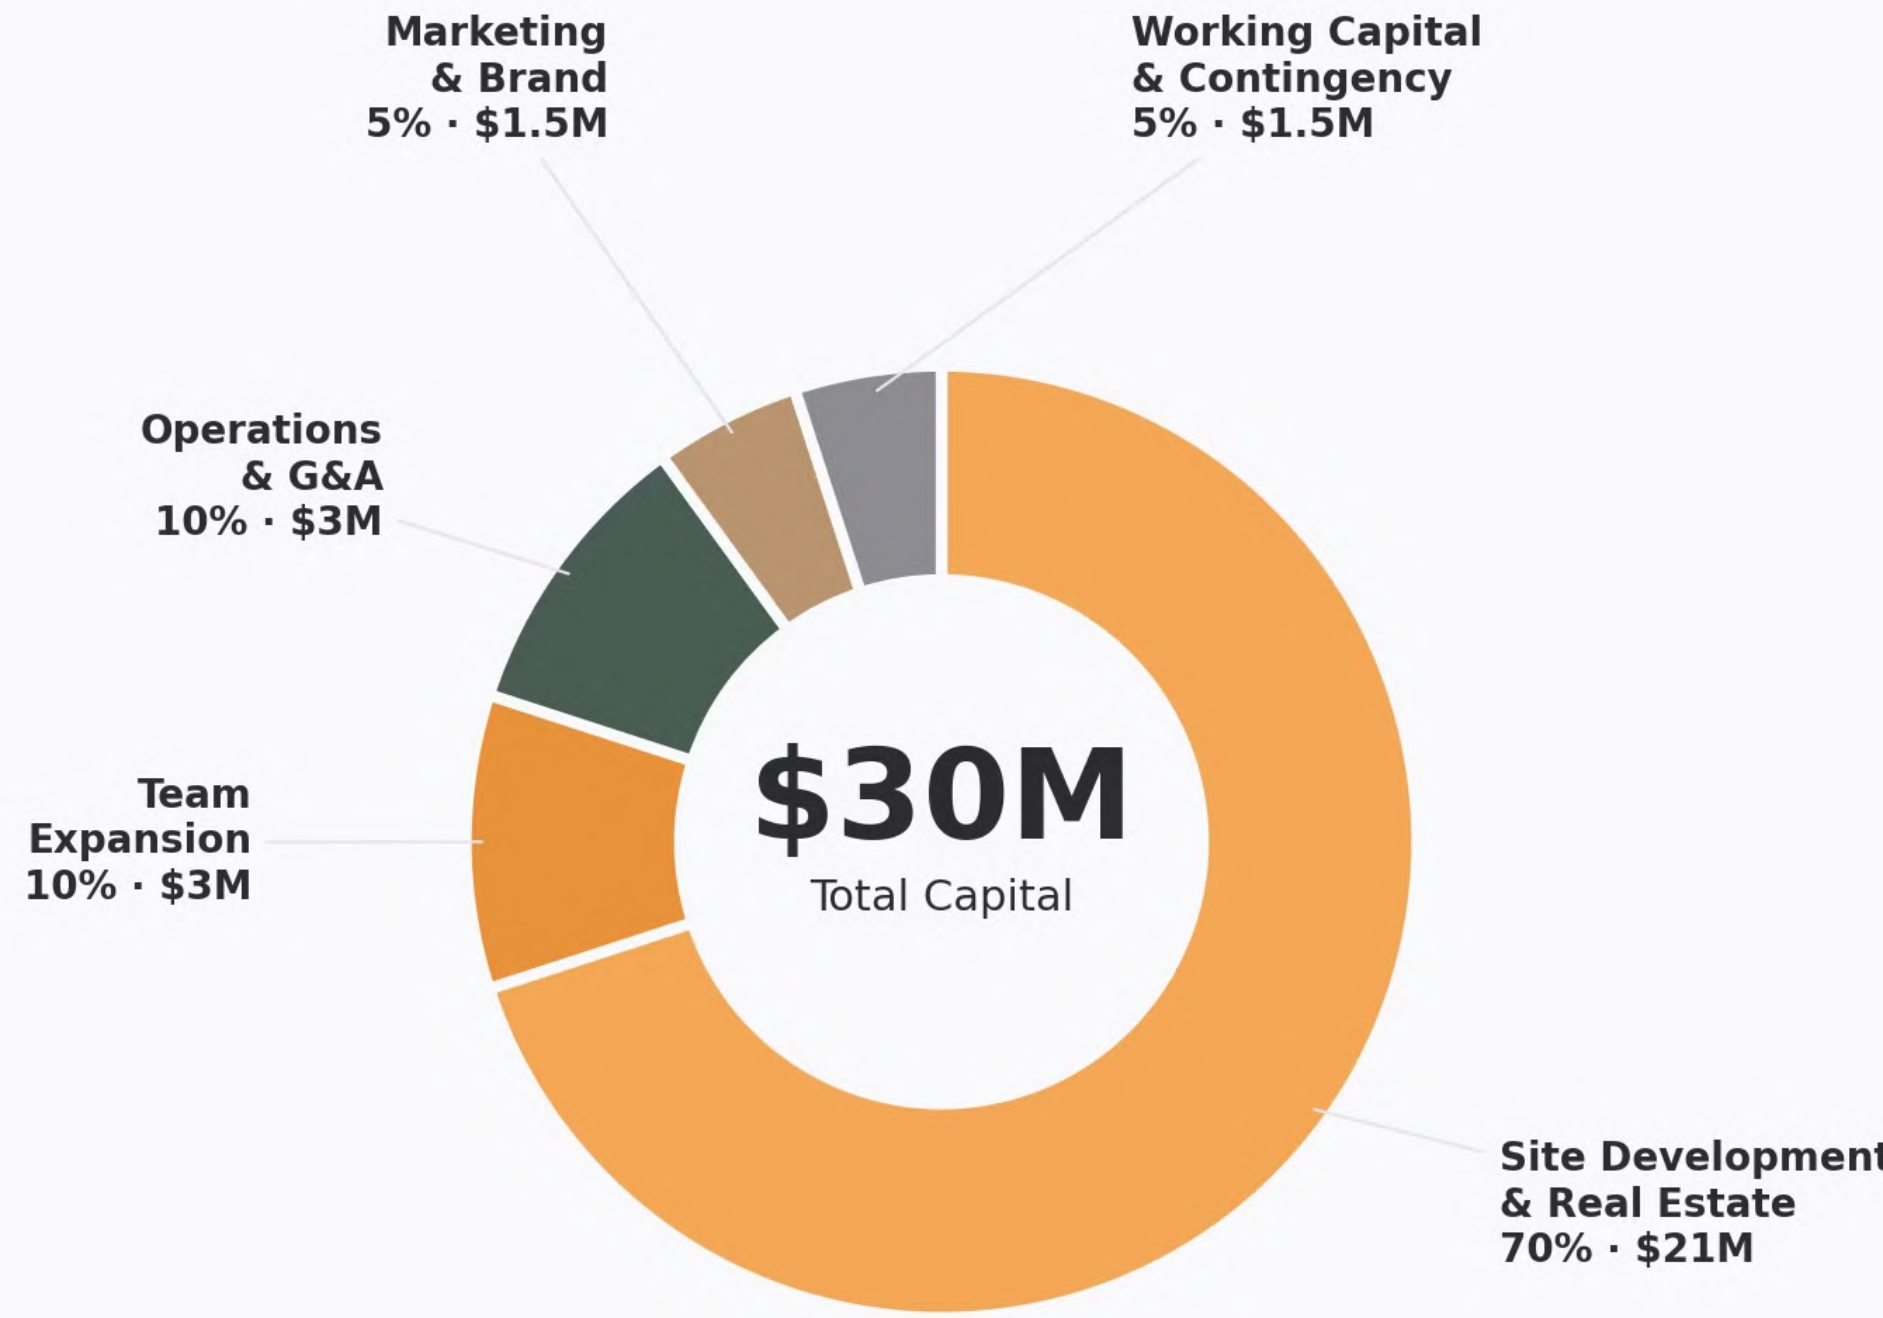

Milestones

Multi-Year Roadmap

USE OF FUNDS

\$30M Total Capital Required — ~\$7M per site
